Diagnostic Impressions:

299.00 (F84.0) Autism Spectrum Disorder

Focus of Session:

To help the client complete the final phase of the job coaching process through onsite and offsite coaching supports

Therapeutic Intervention:

Staff met with personnel management to obtain critical feedback to assist the client. Report was positive and supported prior comments made by direct management. Staff met with client and observed client behavior and ability to recall steps. Client was following list of items obtained from personnel without need for assistance. When unsure, client is able to complete new tasks, client is able to contact co-workers or management to find answers, which was observed.

Planned Intervention:

Staff will continue to observe progress and will update task list accordingly to ensure the accuracy of the client.

Return Appointment: 09/30/2017
